EIICHIRO ODA

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

As the world's population grows, the demand for food and other resources grows. The world's population is expected to reach 6 billion by the year 2000, and 8 billion by the year 2025 (United Nations 1994).

The world's population is growing so fast that the world's resources are being used up faster than they can be replaced. This is a serious problem, and it is one that we must all be aware of.

The world's population is growing so fast that the world's resources are being used up faster than they can be replaced. This is a serious problem, and it is one that we must all be aware of.

The world's population is growing so fast that the world's resources are being used up faster than they can be replaced. This is a serious problem, and it is one that we must all be aware of.
