

Official Desktop of Happy People

Do you fight an endless battle against spyware, worms and viruses? Are you worried that your budget can't stand the cost of another upgrade? Do you have a creeping feeling that your current software vendor doesn't have your interests in mind? Do you find your computer hard to use?

With the GNOME Desktop Environment you don't have to worry about things like this. GNOME is secure, easy to use and won't cost you a cent. There are many vendors to choose from which ensures you will be able to find a support contract that is right for you.

We would like to welcome you to GNU/Linux and the GNOME Desktop.
Welcome to the Official Desktop of Happy People!
