Note: Instead of showing the properties below the skin, we can move them to the right if that's OK for responsive.

The "Copy button would still sit to the left of the "Edit" one. I just don't have Flash installed in order to see it.

We don't need to display the page / collection title in question as it's at the top.
Don't give choice to choose others as that would be confusing with secret URLs on the same page.
When coming via Portfolio -> Shared by me though, it should be possible to select other pages and collections.
