Bug Description

Was ripping George Winston's "Lin Guaraldi". The disc ripped once, I re-ripped the disc, and it crashed.

[crash report stuff \(40.9 KiB, text/plain\)](#)

The screenshot shows the Arabic Jukebox application interface. A modal dialog box is displayed in the center with a yellow warning icon and the text: "The operation couldn't be completed. Input/output error". Below the dialog, a table lists tracks:

Track	Title	Length	Status
5	Youm Wara Youm	4:14	In Progress

At the bottom of the application window, it says "✓ AccurateRip 16 tracks, 77:37 total, 783.479 MiB".
