

Bug #462419 – evince apparmor profile prevents movies from opening

Link to an external video: [link](#)

Description

- Expected to happen: movie opens when clicked on
- What happens instead: help application (totem/vlc) prevented from running by apparmor.
- E.g., evince says: *Unable to launch external application. Failed to execute child process "totem" (Permission denied)*
- Reproducible: 100%
