Text This test will check that simple-scan can be started.

1. Open simple-scan.

Did simple-Scan launch?

Did simple-scan detect your scanner?

If simple-scan did not detect your scanner did you get an error message displaying "No scanners detected"?

This test will check that simple-scan can scan and then save files.

1. Put a document into the scanner and Click "Scan".

Has the document Scanned?

Has the Scanned Document been displayed on screen?

2. Save the file.

Did the file save correctly?

Did the file save as jpg?

3. Navigate to Scanned Document.jpg (by default this should be in /home/USERNAME/Documents/)

Did the file open correctly as a jpg?

This test will check that simple-scan can scan and then save pdf files.

1. Put a document into the scanner and Click "Scan".

Has the document Scanned?

Has the Scanned Document been displayed on screen?

2. Save the file and change the extension from Scanned Document.jpg to Scanned Document.pdf

Did the file save correctly?

Did the file save as pdf?

3. Navigate to Scanned Document.pdf (by default this should be in /home/USERNAME/Documents/)

Did the file open correctly as a pdf?

This test will check that simple-scan can scan change image rotation.

1. Put a document into the scanner and Click "Scan" then click the orange arrow pointing towards the right.

Did the image rotate 90 degrees to the right (clockwise)?

2. click the orange arrow pointing towards the right again.

Did the image rotate another 90 degrees to the right (clockwise)?

3. Put a document into the scanner and Click "Scan" then click the orange arrow pointing towards the left.

Did the image rotate 90 to the left (counter-clockwise)?

4. Click the orange arrow pointing towards the left again.

Did the image rotate another 90 degrees to the left (counter-clockwise)?

5. Right click on the scan click "rotate right".

Did the image rotate 90 degrees to the right (clockwise)?

6. Right click on the scan click "rotate Left".

Did the image rotate 90 degrees to the left (counter-clockwise)?

This test will check that simple-scan can Stop a scan.

1. Put a document into the scanner and Click "Scan". After the scan begins, click "Stop the current scan"
